Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 2, and 4-8 are rejected under 35 U.S.C. 102(b) as being anticipated by the abstract for Chinese Patent No. 1052290 (CN'290).

CN '290 discloses a method of making a ZSM-5 zeolite in which a reaction mixture is formed comprising rare earth containing zeolite Y seeds and sources of sodium, aluminum, silicon and organic amine such as ethylamine. See the abstract in its entirety, including the last line 75-04-7. The organic amine disclosed by CN '290 is also known as an organic templating agent, and corresponds to the "other type of seeding material." The specification specifically defines the phrase as encompassing templating compounds. See the paragraph bridging pages 2 and 3 of the specification.

Allowable Subject Matter

Claims 3, 9 and 10 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

As to claim 3 the prior art fails to disclose or suggest a method of making a pentasil zeolite from a reaction mixture containing both doped faujasite seeds and pentasil zeolite seeds.

As to claim 9, the prior art fails to disclose suggest a method of making a pentasil zeolite from a reaction mixture containing both a doped faujasite seed and another type of pentasil seeding material, which is crystallized for only 3-8 hours.

As to claim 10, the prior art fails to disclose suggest a method of making a pentasil zeolite from a reaction mixture containing both a doped faujasite seed and another type of pentasil seeding material, wherein the reaction mixture is shaped prior to crystallization.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to David Sample whose telephone number is (571)272-1376. The examiner can normally be reached on Monday to Thursday and alternate Fridays.
